

AP Computer Science A (TEC-510)

If you have trouble accessing your account, or if you don't have an account, please send an email to jcarr@timothychristian.org and I will reset your password or create an account for you.

Please complete all the assignments associated with these Units in Codio by August 31, 2026:

Unit 1: Introductions Are In Order

Unit 2: Primitive Control

Unit 3: Strings and Iteration

You do NOT have to do the test reviews, tests or the projects. We will do all of those sections in the first few of weeks of school next year. If you are not prepared, you will struggle in the class.

Even if you took TEC-215 with me previously, you should do all three units again.
